The Book about visualization and modeling is a source of knowledge. This is the main reason why it is recommended to read regularly. The book helps us to learn from the experience of others and use it in solving life's difficulties and problems. Reading is an exercise for the mind, promotes the development of brain activity, thinking, logic, expand horizons and improve memory. Just try to understand the following data:

visualization and modeling, modeling and simulation of complex systems a framework for efficient agent based modeling and simulation, uml 2004 the unified modeling language modeling languages and applications 7th international conf, modeling for reliability analysis markov modeling for reliability maintainability safety and supportability analyses of complex systems, computational modeling of shallow geothermal systems multiphysics modeling by rafid al khoury 2011 09 30.
